

Appl. No. 10/604,569  
Amdt. Dated 4/26/2005  
Reply to Office action of 04/06/2005

### **REMARKS/ARGUMENTS**

This submission is in response to the office mailing of 04/06/2005

Prior resubmissions did not fully comply with the requirements demanded by 37 CFR 1.121. Accordingly, these deficiencies have been addressed in this submission (Rev. No. 1.0) to arrive at a fully compliant application.

The specific outstanding problem with the application at this time is that in the process of rectifying unacceptable statements in the Claims and Drawings sections, portions of the original Specification section were added and expressions were modified. It is now recognized that these changes should not have been made.

Accordingly, this revised submission returns the Specification section to its original form. The patent examiner has advised us that the Claims and Drawings sections are acceptable as revised and they form a part of the current submission.
